Professional summary

DevOps Engineer with 15+ years in technology, progressing from network operations and systems administration into cloud-native infrastructure. For the past 5 years, I've designed and operated Kubernetes platforms on AWS EKS supporting 150+ microservices, reduced deployment times by 70% with ArgoCD/Helm GitOps workflows, and accelerated release cadence from monthly to weekly releases via GitHub Actions CI/CD. Skilled across Terraform/Terragrunt, HashiCorp Vault, Prometheus/Grafana, and container orchestration — with a networking and systems foundation that informs how I architect infrastructure.

Skills

Kubernetes, Helm, ArgoCD, Docker	AWS, EKS, RDS, EC2
Terraform, Terragrunt	GitHub Actions, Jenkins
Grafana, Datadog, Prometheus	Python, Bash, PowerShell
PostgreSQL, MSSQL	Backstage
HashiCorp Vault	Incident Response Management
Cloud Networking Architecture	

Experience

DevOps Engineer   Nov 2021 - Nov 2025

MasterControl   Salt Lake City, Utah

- Managed and deployed multi-region Kubernetes clusters on AWS EKS for over 150 microservices using Infrastructure-As-Code
- Implemented Atlantis for Terraform automation, reducing Terraform wait times from minutes to seconds, enhancing productivity, and accelerating development cycles
- Coordinated GitOps workflows with ArgoCD and Helm, reducing deployment time by 70%, facilitating streamlined deployment, scaling, and management within dynamic containerized environments.
- Managed and maintained CI/CD pipelines and version control systems in GitHub Actions, which cut lead times from a monthly cadence to weekly releases
- Managed a comprehensive monitoring stack with Prometheus and Grafana
- Led numerous optimization/refactoring projects for Terraform modules, simplifying the codebase, and cutting repeated code by over 50%
- Built a PoC for an Internal Developer Portal (IDP) using Backstage

DevOps Engineer   Apr 2020 - Nov 2021

ACD Direct   Ogden, Utah

- Led a company-wide DevOps transformation during a period of rapid growth and built CI/CD pipelines with Jenkins which automated a previously manual process.
- Designed and built CI/CD pipelines with Jenkins, cutting deployment times to production by 70%
- Implemented SSO with Azure and reduced onboarding times by several hours and saved $1500/mo by identifying wasteful user licenses

IT Support Specialist

ACD Direct

Sep 2018 - Apr 2020

Ogden, Utah

- Maintained Windows servers and performed software/security updates on VMWare VMs
- Cut monthly software spending costs by $2000 by migrating the organization to Jira and consolidating work management tools
- Coordinated with dev teams for performing bi-weekly roll-outs to production

Tech Support (T4)

Vivint Smart Home

Nov 2015 - Sep 2018

Logan, Utah

- Responded daily to over 40 support requests from end-users about their home automation equipment
- Conducted quarterly product training courses around networking concepts for teams of 15+ employees which helped agents resolve issues on average 40% faster

Network Operations

Prismview

Jan 2014 - Sep 2015

Logan, Utah

- Configured PC, Networking, and VPN Tunnels remotely with on-site technicians.
- Provided troubleshooting and RMA fulfillment for over 1000 large-format Digital LED displays globally.

Autotech Lead

Best Buy

Sep 2009 - Jan 2015

Logan, Utah

Education

Associate of Science: Electrical Engineering

Utah State University

Jun 2017

Logan, UT
